WHAT TO KNOW ABOUT
PET MOVEMENTS
IN NEW MEXICO

DO I NEED A MOVEMENT CERTIFICATE TO TAKE MY PET INTO AN IZ?

Animals moving from outside of an Infested Zone do not require movement certificates. However, if they are traveling to an Infested Zone, they may benefit from a treatment with a NWS approved product prior to movement.

WHAT DO PETS LEAVING AN INFESTED ZONE NEED?

- It is strongly recommend that pets leaving an Infested Zone be inspected and found to be free of NWS myiasis before traveling.
- If the pet has a wound or condition that causes them to be at higher risk of NWS infestation contact your veterinarian prior to travel.
- If needed, movement certificates can be issued through a licensed and accredited veterinarian or an authorized NWS inspector serving the area
- The movement certificates need to be submitted 48 hours prior to movement so they can be reviewed and approved. Inspections for the certificates must be completed within 5 days prior to movement.
- For any animals leaving New Mexico, please check with the state of destination for their entry requirements.

WHAT DOCUMENTATION IS REQUIRED FOR THE MOVEMENT CERTIFICATE?

- Inspection date
- Origin and destination
- Animal identification information
- Number and type of animals moved
- Treatments administered, if applicable
- Certification that animals were inspected and found free of obvious wounds and signs of infestation
